| 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |

Start by placing two counters (blue and green) on the blue one and the green number one. **Player 1** Start by placing two counters (blue and green) on the blue one and the green number one. They find the sum of the two numbers but cover the number in the grid that would add to that to total 100 with a counter.

Player 2 moves either the blue or the green counter (but not both) They find the sum of the two numbers but cover the number in the grid that would add to that to total 100 with a counter.

Play continues with player one only moving one counter but finding the sum of the two numbers and the corresponding number to total 100 and player two only moving the one counter but finding the sum of the two numbers and the corresponding number to total 100 until one player has **four counters in a row**.
