

100	1	2	24	4	3
10	9	5	30	3	21
25	45	9	4	36	1
6	12	50	16	3	27
18	30	8	14	15	40
32	7	3	50	6	9
5	2	20	8	16	1
15	4	7	50	2	3

Use a pencil and paper clip to spin a fraction. Eg if you spin a $\frac{1}{8}$ you could say an $\frac{1}{8}$ of 64 is 8 and place a counter on the 8.

Player 2 to have their turn.

Repeat, the winner has 4 counters in a row.
