Game 1. Spin the spinner so the number is revealed. Find a number on the grid matching the quantity value and cover with a counter. The first to five in a line wins.

Game 2 – Cover all the numbers in the grid. Spin the category spinner. Each person in the game chooses to remove a counter and compares numbers, looking at the quantity value of the category spun. For example, if ten thousand is spun, and counters are removed from 3 267 389 and 9 856 723, 3 267 389 wins as 60 000 greater than 50 000. The winner is the person with the most counters at the end of the game.
